컬러인덱스 Color Index

컬러인덱스는 국제규격에 따른 안료 또는 염료를 일컫는 표시입니다. 컬러인덱스는 문자(letter)와 숫자의 조합으로 이루어집니다. 예를 들어, PR 168 = Pigment Red 168

The Color Index System is an international standard to denominate dyes and pigments. The pigment is indicated by letters and figures according to the Color Index. The combination of letters and numbers indicate the color category (C.I Name). PR 168 means Pigment Red 168. The following pigments are currently used.

PW = Pigment White

PY = Pigment Yellow

PO = Pigment Orange

PR = Pigment Red

PB = Pigment Blue

PV = Pigment Violet

PG = Pigment Green

PBr = Pigment Brown

PBk = Pigment Black

ShinHan Professional DESIGNERS GOUACHE **NEW**

ENG Highly pigmented ShinHan Professional Designer Gouache provides rich color and flows easily with excellent coverage. It contains the best refined pigments and purified gum arabic to produce highly saturated colors that are beautifully vibrant. ShinHan Professional Designer Gouache is keenly color-crafted with high-performance pigments containing a high lightfastness and is available in 72 colors. The colors brush out smoothly and evenly every time. All of the colors dry matte onto surfaces as smoothly as velvet within a few minutes. By controlling the amount of water dilution, transparency can be adjusted to create results that range from opaque to transparent.

The unique features of ShinHan Professional Designer Gouache allow artists to create beautiful blending and layering techniques. Being popular among designers, illustrators, and commercial artists, ShinHan Professional Designer Gouache offers unlimited color blending possibilities.

A principal difference between watercolor and gouache is that gouache is more opaque. Also, when compared to poster colors, gouache contains more pigment and higher lightfastness, and therefore is more durable.

- High precision color produced by selecting the world's finest pigments.
- Velvet-like matte surface.
- Water-soluble opaque paint with excellent concealment power.
- Highly lightfast color consisting of cadmium and cobalt pigment.

Precaution: Unlike traditional watercolor, when squeezed in a thick layer, dried gouache can crack and may fall off the palette.

FR La gouache ShinHan Professional Designer hautement pigmentée offre une couleur riche et coule facilement avec une excellente couverture. Il contient les meilleurs pigments raffinés et de la gomme arabique purifiée pour produire des couleurs très saturées et magnifiquement vibrantes. La gouache ShinHan Professional Designer comporte 72 couleurs saturées et vives, réalisées avec des pigments de haute performance, et très résistants à la lumière.

Grâce à la gomme arabique, les lavis se font en douceur et restent uniformes. Les couleurs sèchent en quelques minutes avec un rendu mat et une surface lisse et veloutée. Grâce à la forte pigmentation des couleurs, on contrôle parfaitement la dilution pour obtenir des effets aquarellés d'opaque à transparent.

Les caractéristiques uniques de ShinHan Professional Designer Gouache permettent aux artistes de créer de belles techniques de mélange et de superposition. Étant populaire parmi les designers, illustrateurs et artistes professionnels, ShinHan Professional Designer Gouache offre des possibilités de mélange de couleurs illimitées. Une différence principale entre l'aquarelle et la gouache est que la gouache est plus opaque que l'aquarelle. De plus, par rapport aux couleurs d'affiche, la gouache contient plus de pigment et a une résistance à la lumière élevée, par conséquent, l'œuvre est plus durable.

- Couleur de haute précision produite en sélectionnant les meilleurs pigments du monde.
- Surface mate veloutée.
- Peinture opaque hydrosoluble avec un excellent pouvoir couvrant.
- Couleur très résistante à la lumière composée de pigments véritables de cadmium et de cobalt.

Précaution: Contrairement aux aquarelles traditionnelles, la gouache en séchant peut se fissurer et tomber de la palette lorsqu'elle est stockée en couches épaisses.

GER Die hochpigmentierte ShinHan Professional Designer Gouache bietet satte Farben und fließt problemlos mitsamt ihrer hervorragenden Deckkraft. Sie enthält die besten raffinierten Pigmente und gereinigtes Gummi Arabicum, um hoch gesättigte Farben zu erzeugen, die wunderschön lebendig sind. ShinHan Professional Designer Gouache ist aus Hochleistungspigmenten mit hoher Lichtechtheit für intensive Farben gefertigt und in 72 Farben erhältlich. Die Farben lassen sich jederzeit glatt und gleichmäßig ausstreichen. Alle Farben trocknen matt und samtweich auf den Oberflächen innerhalb weniger Minuten. Durch das Abstimmen der Wassermenge kann die Transparenz angepasst werden, um Ergebnisse zu erzielen, die von opak bis transparent reichen. Die einzigartigen Eigenschaften der ShinHan Professional Designer Gouache ermöglichen es Künstlern, wunderschöne Misch- und Überlagerungstechniken zu kreieren. ShinHan Professional Designer Gouache ist bei Designern, Illustratoren und professionellen Künstlern beliebt und bietet fast unbegrenzte Farbmischungsmöglichkeiten.

Ein Hauptunterschied zwischen Aquarell und Gouache besteht darin, dass Gouache deckender ist. Außerdem enthält Gouache im Vergleich zu Posterfarben mehr Pigmente und weist eine hohe Lichtechtheit auf, weshalb sie haltbarer ist.

- Hochpräzise Farbe durch Auswahl weltbesten Pigmente.
- Samtartige matte Oberfläche.
- Wasserlösliche opake Farbe mit ausgezeichneter Deckkraft.
- Extrem leuchtende Farbe bestehend aus Cadmium- und Kobaltpigment.

Hinweis: Im Gegensatz zu herkömmlichen Aquarellen kann getrocknete Gouache beim Lagern in dicken Schichten Risse bekommen und von der Palette abfallen.

KOR 신한 전문가 디자인어 과슈는 최고급 안료와 수용성 아라비검을 사용하여 제조하였으며, 투명 수채물감에 비해 안료의 함량이 높아 선명한 발색과 오펜력이 특징인 불투명 수채물감입니다. 총72색의 고채도 컬러로 선명하고 정확한 색상을 표현할 수 있을 뿐 아니라 내광성이 높은 카드뮴, 코발트 등의 무기안료를 사용한 컬러를 선택하여 사용할 수 있습니다. 붓의 채색 유동성이 우수한 벨벳 느낌의 과슈로서 가베에 따라 투명과 불투명한 표현이 가능하며 블렌딩 표현이 우수합니다.

고채도의 선명한 색상을 단독으로 사용하거나 혼합해서 사용해도 채도가 급격히 낮아지지 않습니다. 또한, 투명한 효과를 내기 위해 열게 녹여 수채화식으로 사용할 수 있으며, 수채화와 혼합도 가능하여 일러스트, 삽화, 애니메이션, 믹스미디어, 회화 등 다양한 현대 회화 영역에 폭넓게 사용이 가능합니다.

- 단계 최고급 안료를 선정하여 제조한 고발색 컬러
- 벨벳 느낌의 매트한 표면을 선사
- 수용성 불투명물감으로 뛰어난 오펜력을 가진 컬러
- 카드뮴, 코발트 안료의 내광성 높은 컬러 선택 사용 가능

주의사항: 과슈는 수채화에 비해 안료를 많이 함유하고 있어 굳혀 사용할 경우 팔레트에서 떨어질 수 있습니다.

ACMI 인증제품 ACMI Label Information

미국 ACMI (미술장적재료연합회)로부터 인체 유·무해성 안전 품질 기준에서 검증, 공인 받아 그 품질을 인증 받은 제품입니다. AP는 인체 유해물질이 기준치 이하일 때 획득하는 마크이며, CL은 인체유해물질이 기준치 이상이나 안전주의 사항을 준수하여 소비자가 안심하고 사용할 수 있을 때 획득하는 마크입니다.

ShinHanArt is a member of the Art & Creative Materials Institute (ACMI). As part of the certification program of this institute, ShinHanArt products are examined by a toxicologist according to the above ASTM D4236 norm. ShinHanArt products have one of the the following ACMI seals. The Confirmation Statement is added below those seals.

AP - Products with the AP seal, approved Product are certified as being non-hazardous.

CL - Products with the CL seal, Cautionary Labelling comes with a warning. This product can be used safely with the safety recommendations followed.
